Cheese is a living product, which continues to ripen and develop from the date of manufacture until it is consumed. Within the best before date range, there is a window of optimum performance for different applications where the cheese has the correct balance of flavour and functional performance.

Fonterra does not recommend using the typical vitamin and mineral values that are stated in this Bulletin as a basis for formulating a nutritional product.

The typical values are an average of representative samples taken from across the manufacturing season, and are based on the typical composition.
